01 Welcome to the Sanctuary

Sonic Sanctuary turns how you feel into a frequency. Pick a Solfeggio tone, tell the sanctuary how you feel, or let your own pulse choose. Then breathe with the pacer while the tone, the colours and the sacred-geometry visuals move with you.

Open it and keep it on your phone

- 1 Go to **frequency-sonic-sanctuary.onrender.com** in Chrome (Android) or Safari (iPhone).
- 2 **iPhone:** tap Share, then **Add to Home Screen**. **Android:** tap the : menu, then **Install app** or **Add to Home screen**. It opens full-screen like any app, with the SS logo as its icon.
- 3 Each visit opens with the animated SS logo. Tap **Tap for sound** to hear it, or **Skip**.
- 4 After the first visit the sanctuary is saved on your device, so the tones and the pacer keep working without a signal.

Your first session in 60 seconds

- 1 **Put on headphones.** Stereo matters - the binaural setting sends a slightly different pitch to each ear.
- 2 **Choose a tone** in the **Solfeggio Tuning** grid (432 Hz is pre-selected), **or** type how you feel into "**Or, tell the sanctuary how you feel right now**".
- 3 **Optional:** pick a pattern under **Breath Practice**, and tap **Fingertip** under **Read Your Pulse** to let your heart rhythm choose the opening tone.
- 4 Press **Tune & Activate Sanctuary**. The tone fades in over about 1.5 seconds and the session timer starts.
- 5 Breathe with the ring. When you are done, press **Pause Sanctuary**. Sessions of 5 seconds or more are saved to **Recent Sessions**.

The order you meet things on the page: the celestial header and title, **The Solfeggio Resonance** list with the couple under Metatron's cube, **Read Your Pulse**, **Breath Practice**, the feeling box, **Preset Journeys**, the practitioner with the **Solfeggio Tuning** grid and sliders, and **Recent Sessions**.

02

The Solfeggio Resonance

Ten tones, each paired with a chakra and its colour. The descriptions are Mahal's own words from the app. 174, 285 and 432 Hz work on the **whole body**, so they carry the full rainbow and light every chakra at once.

STONE	NAME	WHAT IT TARGETS (IN MAHAL'S WORDS)	CHAKRA · COLOUR
174	Foundation Pain Release	Heavy physical body grounding blocks and structural safety.	 Whole Body · All Chakras
285	Tissue & Cellular Repair	Cellular blueprint optimization and accelerated field restoration.	 Whole Body · All Chakras
396	Liberate Fear & Guilt	Dissolving deep-seated emotional anchors and clearing systemic blocks.	 Root · red
417	Undo Change & Clear Residue	Flushing out stagnant energetic static lines and clearing environments.	 Sacral · orange
432	Cosmic Alignment Baseline	Deep vagal nervous system balancing and natural geometric synchronization.	 Whole Body · All Chakras
528	Cellular Transformation DNA	Core metabolic matrix amplification, deep cellular repair, and life transformation shifts.	 Solar Plexus · yellow
639	Heart Relational Harmony	Processing coherent empathy loops and profound emotional realignments.	 Heart · green
741	Throat Expression Detox	Sound purification pathways and creative structural expression cleaning.	 Throat · blue
852	Third Eye Intuition	Precise vision clearing, mental clarity, and higher cognitive depth.	 Third Eye · indigo
963	Crown Unity Field	Absolute universal connectivity vectors and complete systemic field synthesis.	 Crown · violet

Two ways to choose: tap a row in **The Solfeggio Resonance** list and the matching tile in the **Solfeggio Tuning** grid is pressed for you, or tap the tile itself. Your last tone is remembered on your device.

03

Colour Coupled With Sound

In the sanctuary, the sound and the colour are one signal. The tone you choose decides which chakra centre lights up, which colour the page glows in, and which resonance pattern forms behind the practitioner. Seeing and hearing the same frequency gives your attention one place to rest - the heart of the practice.

What you hear

- **The tone:** two pure sine waves, one in each ear.
- **Binaural offset** (0-12 Hz, starts *off*): raises the right ear's pitch slightly; your brain hears the difference as a soft beat. Headphones needed.
- **Warmth undertone** (0-100%): a soft pink-noise bed under the tone.
- **Volume:** starts at 35.
- Tones fade in over about 1.5 s, glide when you switch, and fade out when you pause - no clicks, no jolts.

What you see

- **The chakra bloom:** on the crystal practitioner, the centre that matches your tone blooms with a slow pulsing glow; her caption reads *Chakra · Hz*. Whole-body tones light all seven softly.
- **The resonance plate:** a Chladni pattern - the shape sand makes on a vibrating plate - changes with every tone and grows more intricate as the tone rises.
- **The singing bowl:** the gold flare circling the bowl follows the frequency - one orbit takes 4.6 s at 174 Hz and 1.7 s at 963 Hz.
- **The waveform** draws your live tone in teal, gold and purple, with the **breath ring** beside it.
- The title rides the real sound level, and the sun, Saturn and moon are joined by vibrating "super strings."

The colour map at a glance

COLOUR	CHAKRA	STONE	REACH FOR IT WHEN YOU FEEL...
 Red	Root	396	Stuck, fearful, frozen, guilty
 Orange	Sacral	417	Heavy, low, sad, after a hard change
 Yellow	Solar Plexus	528	Tired, drained, burnt out
 Green	Heart	639	Lonely, heartbroken, tight in the chest
 Blue	Throat	741	Unheard, holding words back
 Indigo	Third Eye	852	Scattered, foggy, thoughts racing - or ready to focus
 Violet	Crown	963	Open, grateful, inspired
 Rainbow	Whole body	174 · 285 · 432	Aches, recovery, or simply a calm baseline

The feelings column follows the sanctuary's own feeling map (section 06).

04

The Heart Rate Sensor

Your phone's camera and flashlight can read your pulse through your fingertip, using light that passes through the skin. The sanctuary uses the reading to meet your nervous system where it actually is.

How to take a reading

- 1 Scroll to **Read Your Pulse** and tap **Fingertip**.
- 2 Allow camera access when your phone asks. The badge in the top-right corner switches from *Camera off* to *Camera on*.
- 3 Cover the **rear camera lens** with the pad of your finger - "*Light pressure - resting weight, not squeezing.*" On most Android phones the flashlight turns on to light your fingertip.
- 4 Hold still. "*A reading takes about fifteen seconds to steady.*" Your breathing rate needs about 45 seconds.
- 5 Follow the live hints: "*Strong signal*" means you are set; "*Signal too weak to trust*" means hold stiller with steady contact.
- 6 Tap **Fingertip** again to stop the camera.

What the readout chips mean

CHIP	WHAT IT SHOWS
HR	Heart rate in beats per minute (reads 40-180 bpm).
RMSSD	Heart-rate variability in milliseconds - the small natural changes between beats. Higher usually means more rested.
Coherence	<i>high · rested</i> (RMSSD 55+), <i>mid · steady</i> (30-54), or <i>low · alert</i> (under 30). Rough guides, not a diagnosis.
Breath	Breaths per minute, worked out from your pulse rhythm.
Signal	<i>strong, usable, weak or no signal</i> - how much to trust the numbers.

How your pulse picks the tone

Take a reading **before** you start and the sanctuary chooses your opening tone, explaining why under **Somatic Innerstanding**:

YOUR HEART-RATE VARIABILITY (RMSSD)	OR, IF RMSSD ISN'T READY, YOUR HEART RATE	OPENING TONE
under 20 ms	90 bpm or more	432
20-39 ms	75-89 bpm	528
40-64 ms	60-74 bpm	639
65 ms or more	under 60 bpm	852

Once a tone is playing, your pulse will not change it - you stay in control. Your average, lowest and highest heart rate are saved with the session.

Private by design: "The camera reading happens entirely on this device. No image is recorded, stored or sent anywhere." **Tips:** use the secure link (<https>); on iPhone, Safari cannot switch on the flashlight, so take your reading in bright light.

05

The Breath Stacker & Breath Practice

Choose a pattern from the **Breath Practice** menu. When you start a tone, the breath ring begins: it **grows** as you breathe in, **holds** while you hold, and **shrinks** as you breathe out. Each phase lasts exactly its count, and the practitioner's aura breathes with you.

Breath Stacking - Viloma (the breath stacker)

"The inhale arrives in three sips, each held a moment, stacking breath up through belly, ribs and chest before one long release."

STEP	CUE ON THE RING	SECONDS
1	Sip one - into the belly	2
2	Hold	2
3	Sip two - into the ribs	2
4	Hold	2
5	Sip three - into the chest	2
6	Hold - full	2
7	Release - all of it	8

One full stack is 20 seconds - about 3 breaths a minute - and it repeats until you pause the sanctuary.

All nine patterns

PATTERN	COUNTS (SECONDS)	WHAT IT IS FOR
Coherent Breath default	in 5 · out 6	About five and a half breaths a minute, "the rate where heart rhythm and breath fall into step."
Breath Stacking - Viloma	2-2-2-2-2 · out 8	Three stacked sips, one long release (above).
Three-Part Breath - Dirgha	in 6 · hold 2 · out 8	One continuous stacked inhale - belly, ribs, chest - then empty in reverse.
Equal Breath - Sama Vritti	4 · 4 · 4 · 4	Box breathing. "Steadies an agitated mind without sedating it."
Extended Exhale - 1:2	in 4 · out 8	"The simplest reliable way down."
Relaxing Breath - 4-7-8	in 4 · hold 7 · out 8	Suited to the end of the day. <i>Shorten the hold if you feel lightheaded.</i>
Ocean Breath - Ujjayi	in 6 · out 6	A soft narrowing at the throat so the breath sounds like distant surf.
Bee Breath - Bhramari	in 4 · out 8 (hum)	Hum the whole exhale - the vibration "meets the sanctuary tone directly."
Alternate Nostril - Nadi Shodhana	4-4-4 left, 4-4-4 right	Balances the two sides. Keep the hand soft on the face.

Breath following: with the pulse sensor on, the sanctuary compares your real breathing with the pattern and tells you whether you are *in step* with the pacer, *breathing faster* or *breathing slower*.

06 Feeling → Frequency

Type how you feel into "Or, tell the sanctuary how you feel right now" and press Enter or **Tune & Activate Sanctuary**. The sanctuary reads your words, explains what it hears under **Somatic Innerstanding**, and opens the matching tone.

IF YOU WRITE WORDS LIKE...	TO NE
anxious, overwhelmed, cortisol, panic, jittery	432
scattered, foggy, distracted, monkey mind, spiraling	852
chest, heart, grief, heartbreak, lonely, isolated	639
fear, guilt, shame, stuck, frozen, paralyzed	396
sad, depressed, heavy, low, dark, blue	417
tired, fatigued, exhausted, drained, burnt out	528
voice, speak, throat, silenced, unheard	741
joy, open, grateful, blissful, inspired	963
pain, ache, sore, inflamed	174
anything else	432 baseline

285 Hz is not on the feeling map - choose it from the grid or a journey.

07 Preset Journeys

A journey plays a sequence of tones, gliding from one to the next, then releases to silence. Tap a journey card to begin; tap **stop** to end early.

JOURNEY	FOR	STEPS
Morning Coherence	Wake the field gently	396 Hz 3 min → 528 Hz 4 min → 639 Hz 3 min
Midday Cortisol Reset	Return to baseline after the workday spike	432 Hz 5 min → 528 Hz 3 min
Evening Descent	Slow the tempo, prepare for sleep	432 Hz 5 min → 174 Hz 8 min
Grief Release	Move stagnant heart-cavity holding	417 Hz 4 min → 639 Hz 5 min → 432 Hz 3 min
Deep Focus study	Third-eye + crown for immersive work	852 Hz 10 min → 963 Hz 5 min

Make your own: tap + **new preset**, give it a name and notes, add steps (any tone, 10 seconds to 60 minutes each), then tap **save preset**. Your journeys stay on your device; tap × to delete one.

08 Recent Sessions

Every session of 5 seconds or more is saved with the date, the tone, your feeling or journey, your average heart rate (if the sensor was on) and how long you stayed. Tap **export CSV** to download your history, or **clear** to start fresh.

09 Daily Rituals

WHEN	DO THIS
Morning	Morning Coherence with Coherent Breath . Take a fingertip reading first and watch your coherence chip rise over the week.
Study / deep work	Deep Focus (852 → 963 Hz), headphones on, volume low, warmth undertone around 30%.
After a workout	Extended Exhale - 1:2 with 528 Hz to bring your heart rate back down.
Stress spike	Type "overwhelmed" and let the sanctuary open 432 Hz. Add three rounds of Breath Stacking - Viloma .
Sunshine sit	Sit outside with 963 Hz and Ocean Breath, eyes soft. Let the colour and the light do the work.
Bedtime	Evening Descent with Relaxing Breath - 4-7-8 .

10 Better Together: Alignment 365

Sonic Sanctuary pairs with **Alignment 365**, the all-in-one wellness tracker at alignment365.onrender.com. On the Alignment 365 home page, tap **Sonic Frequencies** in the hero, or **Enter the Sonic Sanctuary** in the **Tune Your Frequency** section, and the sanctuary opens in a new tab. Log the workout in Alignment 365, then come here to come back down.

A wellness note. Sonic Sanctuary is a relaxation, meditation and wellness tool. The tone descriptions come from the Solfeggio tradition and Mahal Kita's wellness practice; they are not medical claims. The sanctuary is not a medical device and is not intended to diagnose, treat, cure or prevent any disease. Heart-rate, variability and breathing readings are estimates for relaxation feedback only. Talk to your doctor before relying on any reading or making health decisions, especially if you are pregnant or have a heart, seizure or breathing condition. If you feel dizzy or lightheaded during a breath practice, return to normal breathing. In an emergency, call your local emergency number.

TUNE IN. REALIGN. EVOLVE.

Experience the frequency that heals from within.
